

Cooling Liquid || BN 154567

Trade name	SPINNER-SPEZIAL-KUEHLFLUESSIGKEIT
Appearance	clear, transparent
Density	1.083 g/cm ³ @ +20 °C
Chemical composition	50 Vol. % distilled water 50 Vol. % ethylene glycol 0.2 % by weight copper-passivator related to ethylene glycol
Material compatibilities	copper and copper alloys for use in SPINNER cooling units e.g. BN 546450, BN 546460, BN 546470
Safety data sheet	M36231
Boiling point, min.	100 °C
Antifreeze	-35 °C
Package	25 litre plastic container
Weight, approx.	28.3 kg (25 l liquid + plastic container)
Scope of delivery	safety data sheet
