

The RoHS directive 2011/65/EU restricts the use of certain hazardous substances in electrical and electronic equipment. Electrical and electronic equipment in the scope of the directive may not contain Pb, Hg, Cr(VI), PBB and PBDE above 0,1% and Cd above 0,01% in the homogenous material unless exemptions, defined in Annex III of the directive, are applicable. The amendment (EU) 2015/863 adds four new substances (DEHP, BBP, DBP, DIBP) to the Annex II of the RoHS directive. The amendment entered into force on 22 July 2019.

SPINNER is aware of the RoHS directive 2011/65/EU and the amendment 2015/863. Although most SPINNER products are components and thus not in the scope of the RoHS, nearly all SPINNER products comply with the RoHS substance restrictions.

We confirm, based on our current knowledge and the information received from our suppliers, that the products below are in compliance with the substance restrictions of directive 2011/65/EU and the amendment 2015/863:

SPINNER products for applications within the RoHS scope	Annex III exemption numbers
Coaxial Connectors and Adaptors	6c
Surge Protectors and DC Breaks	6c
Jumper Cable Assemblies	6c
Filters (Band-Pass, Band-Stop, Low-Pass and Uplink / Downlink Filter)	6c
Combining Products and Systems (MNCS®)	6c
Distributed Antenna Systems (Splitter and Coupler)	6c
In-building Antennas	6c
Loads and Attenuators	6c
